

Balqis Naguwib

Sepang, Selangor | balqisnaguwib@gmail.com | +60139892596 | linkedin.com/in/balqisnaguwib | github.com/balqisnaguwib

SUMMARY

Full Stack AI Engineer with **2 years** of professional experience developing end-to-end AI solutions and scalable web applications. Specialized in **Python, FastAPI, React.js**, and **deep learning frameworks (PyTorch, TensorFlow)** with expertise in deploying production-ready AI systems (**RAG, computer vision**) for enterprise clients. As of 1st September 2025, I will be available for full-time employment (40-hours work week).

TECHNICAL SKILLS

Frontend

JavaScript (React.js, Next.js, Angular), TypeScript, HTML/CSS

Backend

Python (FastAPI, Rest APIs), Node.js, C/C++, C#, MySQL

Tools

Microsoft Power Platform (Power App, Power Automate, Power BI), Microsoft 365, XAMPP

AI/ML

Pandas, PyTorch, TensorFlow, Keras, Scikit-Learn, LangChain, Computer Vision, NLP, Generative AI, RAG, Prompt Engineering, YOLOv8, Predictive Modeling, Supervised/Unsupervised Learning

EXPERIENCE

Assistant Manager, AI Model Engineer | **Telekom Malaysia** 05.2025 - Present
Cyberjaya, Selangor

- Implemented full-stack solutions using FastAPI backends, React/Next.js/Angular frontends, and MySQL database architecture
- Built customizable AI chatbot SaaS platform with Azure OpenAI, supporting multi-tenant architecture and embeddable widgets with JWT authentication, knowledge base management, and production-ready deployment systems
- Developed semantic RAG chatbot system for e-commerce client with real-time document management capabilities

Assistant Manager, IT and Digital | **Telekom Malaysia** 07.2024 – 04.2025
Bangsar, Kuala Lumpur

- Planned and executed procurement and contract management to ensure timely, cost-effective supply of IT materials and digital services.

Junior AI Engineer | **MISHU Sdn Bhd** 02.2024 – 01.2025
Bukit Jalil, Kuala Lumpur

- Built AI call agent for debt collection using VAPI, FastAPI and Next.js improving sales team efficiency by 40%
- Developed AI Business Consultant chatbot using LangChain, OpenAI API, and NLP for WhatsApp Business integration
- Automated system integrations between HubSpot CRM, ChatDaddy, and Flowise using Power Automate and Zapier

AI Specialist Apprentice | **Aerodyne Group** 08.2023 – 01.2024
Cyberjaya, Selangor

- Deployed YOLOv8 computer vision models for real-time defect classification on electric poles using PyTorch
- Curated and annotated datasets using CVAT and Roboflow for supervised learning model training
- Implemented predictive modeling techniques and created Power BI dashboards for data visualization
- Achieved superior accuracy in defect detection through advanced machine learning algorithms

EDUCATION

Bachelor of Engineering (Mechatronics)

10.2019 – 07.2023

International Islamic University Malaysia (UIAM)

- CGPA : 3.34
- Elective in Computer and Control : Software Engineering, Intelligent Systems, Modern Control Design

PROJECTS

Customizable and Embeddable AI Chatbot Builder System

05.2025

- Developed multi-tenant SaaS platform enabling users to create and deploy custom AI chatbots
- Implemented JWT authentication, RAG techniques for knowledge base management, usage and chat log monitoring, AI-powered dashboard, and embeddable widget.
- Integrated Azure, Ollama, and OpenAI models for intelligent, context-aware chatbot responses

AI-Powered Invoice Data Extraction System

05.2025

- Achieved consistent 30-second processing times and superior accuracy for data extraction using vision models and optimization techniques over traditional OCR methods
- Built scalable full-stack solution with React/Next.js frontend and FastAPI backend for automotive client
- Implemented MySQL database architecture for secure storage and retrieval of extracted invoice data

Crack Characterization using Machine Learning and Optimization Techniques

07.2023

- Awarded with the best overall final year project in the Mechatronics Department.
- Developed Support Vector Machine (SVM) with Particle Swarm Optimization and K-Fold Cross Validation achieving 85.16% accuracy to characterize the crack depth
- Implemented signal processing techniques and statistical modeling using Python and Pandas
- Created user-friendly software interface for real-time defect characterization and analysis

CERTIFICATES

AI Engineering Professional Certificate | IBM

03.2024

Project Management Specialization | Google

05.2024

Certification of Registration of Graduate Engineer | BEM

10.2023

HONORS & AWARDS

Best Overall Final Year Project | Department of Mechatronics

Semester 2, 2022/2023

Dean's List Awards | Department of Mechatronics

2019/2020

Future Leadership Scholarship | Yayasan Telekom Malaysia

2019 - 2023
